PROJECT WORK

Olive Branch | Frontend Developer | Live | Code

Communication tool that makes it easier for loved ones to reach out to each other after a conflict.
- ❖ Developed audio recording and photo upload features from Figma design utilizing Next.js and React.js.
- ❖ Coordinated/communicated technical implementation of blockers and progress to the team during development.
- ❖ Collaborated on a cross-functional team in an Agile environment to develop scope, technical implementation, deployment.

WhereToGo | Full Stack Developer | Live | Code

Travel application that populates popular restaurants based on the user's destination.
- ❖ Developed the server-side API call for Yelp Fusion to fetch popular restaurants by location and configured the server-side post request that saves the restaurant results to our MongoDB database.
- ❖ Configured Passport middleware utilizing a JSON Web Token to give two level protection for user's login data. Login status was maintained even after application reload.
- ❖ Architected and developed backend routes, controllers, and DB schema using the MVC structure.
- ❖ Collaborated with 2 developers on client side user validation and rendering of restaurant results.

Future Endeavors | Backend Developer | Live | Code

Bucketlist application that allows the user to create future events. Inspired by the COVID-19 Pandemic in 2020.
- ❖ Designed and developed model association for user accounts and activities, backend routes for activities, users and validations.
- ❖ Configued and integrated schema utilizing JawsDB MySQL as our database to store and sync user data.
- ❖ Coordinated and integrated backend routes and notifications to frontend static HTML pages.
- ❖ Utilized Handlebars for server side templating, deployed on Heroku.

PROFESSIONAL EXPERIENCE

InstaHub | Frontend Developer | San Francisco, CA   Mar. 2022 - Present
- ❖ Developed in an Agile environment with Data Science/Analytics and Product UI/UX Design teams to build out the existing SaaS IoT web application dashboard.
- ❖ Developed UI components for new application features, utilizing ClickUp during 2 week sprints.

Rider Levett Bucknall | Project Engineer | San Francisco, CA / Hilo, HI   Mar. 2013 - Apr. 2020
- ❖ Lead design and build project teams to meet project schedule, quality and cost for various commercial construction projects.
- ❖ Chaired and documented weekly Owner, Architect, Contractor meetings, to plan, communicate, delegate and negotiate specific project items related to safety, design, sitework issues, schedule and cost.
- ❖ Created monthly budgets incorporating cash flow and forecasting utilizing pivot tables and MS Power BI.
- ❖ Recognized: Henry George Award Nominee for Outstanding Employee.
